DETAILED ACTION

Response to Amendment

1. Applicant's amendment and accompanying remarks filed 9/26/07 have been fully considered and entered. Claims 1-15 and 29 are canceled, claims 16-28 and 30-38 have been amended and new claim 39 has been added. Applicant's cancellation of claims 1-15 renders moot the rejections of claims 15-28 and 30 rejected under 35 U.S.C. 103(a) as being unpatentable over Shaffer et al., US 5,916,393 in view of Riedel et al., US 5,631,073. As such, these rejections are hereby withdrawn. In view of Applicant's amendments claims 16-28 and 30-39 are found allowable for reasons set forth herein below.

Election/Restrictions

2. Claims 16-28, 30-33 and 39 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(b), claims 34-38, directed to the process of making or using the allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because a claimed invention previously withdrawn from consideration under 37 CFR 1.142 has been rejoined, **the restriction requirement of group I, claims 15-33 as set forth in the Office action mailed on 3/26/04 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C.

121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance: Claims 16-28 and 30-39 are found allowable. Specifically, the prior art made of record in previous actions fails to teach or fairly suggest further applying a polyethylene or polyester based powder to the adhesive face as set forth in independent claims 31 and 33. An updated art search produced the closest prior art of Nelson et al., US 5,232,838 which teaches coating a substrate with a water based adhesive and a dusting layer of a cold water soluble powder (Abstract). Nelson et al., however, fails to teach a polyethylene or polyester based powder. Presently, no motivation exists to combine references to form an obviousness type rejection.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lynda M. Salvatore whose telephone number is 571-272-1482. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris can be reached on 571-272-1478. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
